

Lost: 12 Foot Tall Praying Mantis

A couple of your weird neighbors have built something very strange and wonderful. She is:

- ◆ Backpack mounted
- ◆ Glowing green neon
- ◆ Electric plasma eyes
- ◆ Answers to the name of "Mantis"

Since her bizarre disappearance after performing for the children of Bud Beasley Elementary school, Mantis eludes authorities and the Vistas Homeowners Association as she waits for her favorite day in the season to arrive... 4th of July!

Join in with children of all ages as we dawn our glow sticks, blinky lights and American Flags to welcome her at the corner of Madrid Dr. and Spandrell Cir. and begin **The Parade of the Night Creatures** at 8:30 PM. Mantis will lead the way to the bottom of Madrid at Vista Terrace where we can view the fireworks together as a neighborhood community.
